Objective

Seeking a challenging position in a reputed organization where I can learn new skills, expand my knowledge, and apply my expertise. I aim to leverage my potential and contribute to the organization's growth while upholding a strong work ethic.

Experience

- **Revalsys Technologies**   27/01/2025 - Present
  Angular Developer
  Experienced Angular Developer with strong knowledge of Angular dynamics. Proficient in working with the latest Angular versions and modern concepts. Skilled in building responsive and scalable web applications. Expertise in integrating APIs, state management, and performance optimization. Passionate about writing clean, maintainable, and efficient code.

- **Aseuro Technologies Private Limited**   26/09/2022 - 29/11/2024
  Junior Angular Developer
  Strong knowledge of modern frontend technologies such as Angular 13+, and experience in executing frontend projects on the client side using Kendo UI and Bootstrap 5. Additionally, handled customer-facing applications, including payment systems, with Jasmine and Karma testing, along with SonarQube for code quality analysis.

Projects

- **FMG - Digital Self-Service**
  This project functions as a customer-facing insurance application where users can manage policy payments, beneficiaries, upsell options, and more. I was responsible for migrating the entire application, developing and implementing new functionality based on client requirements, and conducting Jasmine and Karma tests.
- **FMG - In house Applications**
  Worked on five in-house applications, each fully utilizing Kendo Angular libraries. I handled Angular and Kendo migrations, developed screens across all applications, and contributed to iFrame and microservice applications. Received client appreciation for one of these projects.

Skills

- Frontend Web Development - Angular 13+, Typescript, HTML, CSS, Kendo UI, Bootstrap, Karma, Jasmine, SonarQube, and Angular migration.
- Language - C, Java, JavaScript, Typescript, SQL, Node.js, Express.js
- Tools - Visual Studio Code, Code::Blocks, Eclipse, DBeaver, Mocha, TortoiseSVN, Jenkins, AWS CodeCommit, and S3 Bucket Hosting.
- Database Development - Data Modelling, Stored Procedures.

Certifications

- **Udemy**
  Angular - The Complete Guide (2023 Edition)
  Master Angular and build modern web applications. Learn about components, directives, services, and the Angular CLI. This comprehensive course covers everything from fundamentals to advanced topics.
  CSS, Bootstrap, JavaScript, Web Development Course
  Gain a strong foundation in web development technologies. Explore CSS for styling, Bootstrap for responsive design, and JavaScript for dynamic functionality. This course is ideal for beginners and intermediate developers.
  HTML & CSS - Certification Course for Beginners
  Learn the building blocks of web development. Understand HTML for structuring content and CSS for styling elements. Prepare for a certification exam and kickstart your web development journey.

- **Spoken Tutorial Certificate of Completion**
  HTML Training
  This certificate acknowledges the successful completion of the HTML training program provided by Spoken Tutorial.

Achievements & Awards

- Spoken Tutorial Participation Participated in the following training programs: * Java: Acquired foundational knowledge and skills in Java programming. * Advanced C++: Delved into advanced C++ concepts and techniques. * HTML: Developed proficiency in HTML for creating web page structures. Conducted by: ICT Academy Organized by: VCET These training programs provided hands-on experience and valuable insights into the respective programming languages.
- Active Participation in Student Organizations Member of: Rotaract Club and Green Club. Successfully conducted: Sports Activities, Blood Camp, Tree Plantation, and other events. As a member of these organizations, I actively participated in community service initiatives, environmental conservation efforts, and student-led activities.

Roles And Responsibilities

- Developing bug-free applications. Participating in backlog grooming calls and understanding the requirements.

- Conducting code reviews for junior developers. Writing unit tests for specific user stories. Collaborating with the architecture team. Delivering the application within the set deadlines.

Education

Course / Degree	School / University	Grade / Score	Year
Secondary School Leaving Certificate	Adharsh Vidhyalaya Matric Hr. Sec. School	85%	2016
Higher Secondary School Certificate	Kongu National Matriculation and Higher School	69%	2018
B.E - Computer Science Engineering	Velalar College of Engineering and Technology	84%	2022

Activities

- Python Training for Implant Professionals Location: Durga Tech, Erode, Tamil Nadu Duration: 12 Days This intensive training program is designed to equip dental professionals with the essential Python skills needed to enhance implant planning, analysis, and outcomes.
- Data Analysis Internship Company: Prayoga Technologies Duration: 30 Days This internship provides an opportunity to gain hands-on experience in data analysis. You'll likely work on real-world projects, developing your skills in data manipulation, cleaning, analysis, and visualization.
